Current Quantity	-3 EACH
Requested decrease	5 EACH
Result	-8 EACH

This adjustment would reduce stock below zero. Phase-1 inventory policy blocks negative stock. Posting is blocked — no stock effect occurs.

COUNT BASIS / CONCURRENCY

Expected quantity basis is determined by configured inventory count policy. This is an open MiniMart decision — Design shows illustrative examples of both directions without choosing one.

AUTHORITY-DEPENDENT EXAMPLE

Scope Locked

Stock-affecting transactions on in-scope items are held until the count closes.

AUTHORITY-DEPENDENT EXAMPLE

Transactions Continue + Reconciliation

Transactions continue; variance is reconciled against activity that happened during the count.
